

Consolidate Your Solar Tech Stack Into One Platform

Sunvoy replaces 10+ tools with a single solar operating system

No more paying for separate tools like DocuSign, Mailchimp, or Podium. Sunvoy unifies everything you need to run your solar business, fully branded, automated, and built for the entire customer journey.

Sunvoy has been rated 5/5 stars by hundreds of solar installers like you!

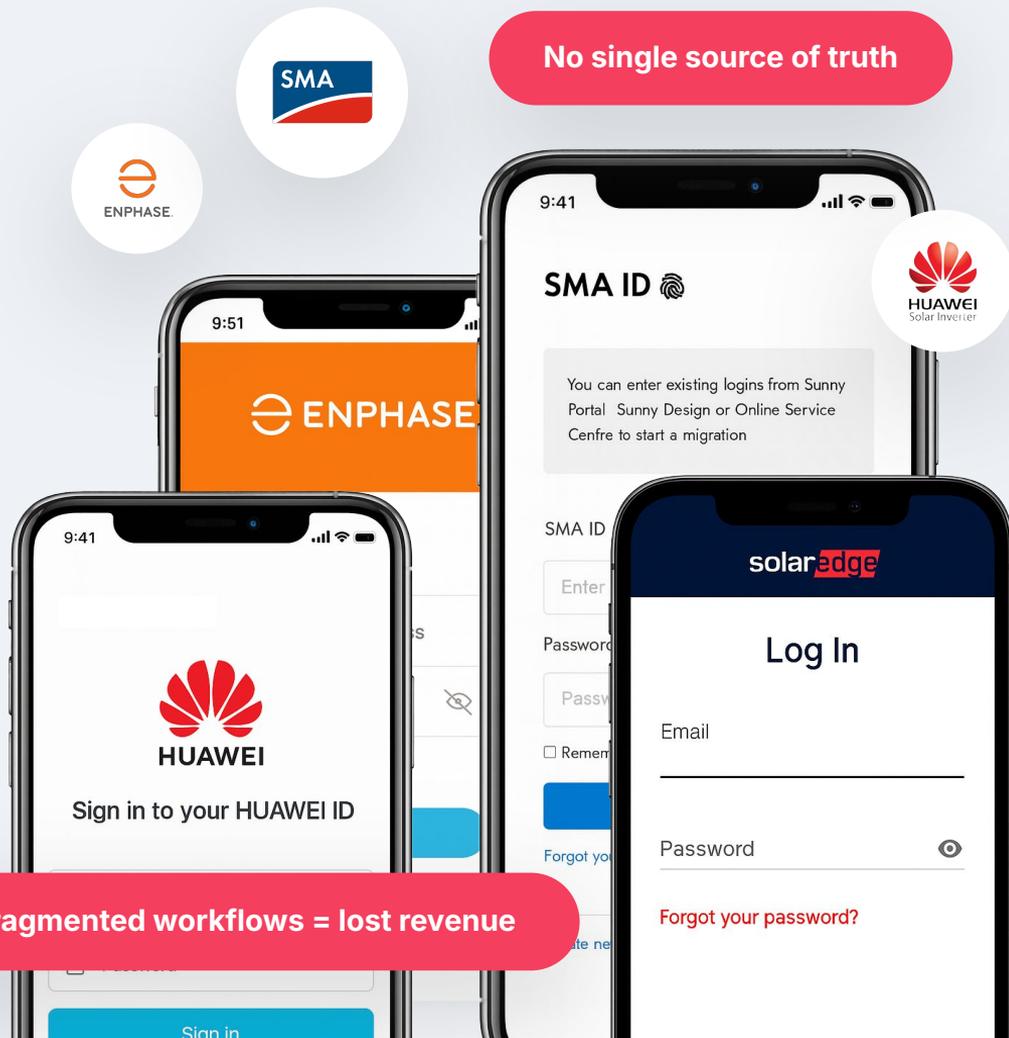

Installers Are Drowning in Software Subscriptions

Most solar companies **use 8-12+ different platforms** to manage daily operations:

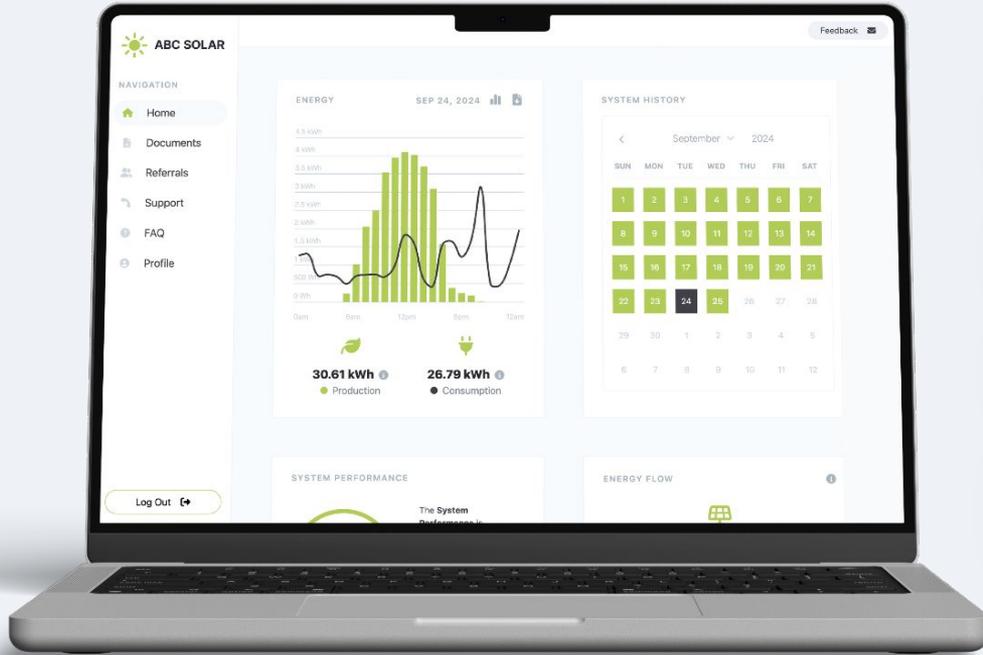

- Field teams capture photos in one app.
- Office staff track referrals in another.
- Customers sign contracts through a third app.
- Support runs through separate tools entirely.

And none of these platforms talk to each other, **creating even more paid subscriptions.**

Sunvoy Brings Everything Together

One platform for your entire solar operation — connecting sales, operations, service, and customers.

Consolidate tools

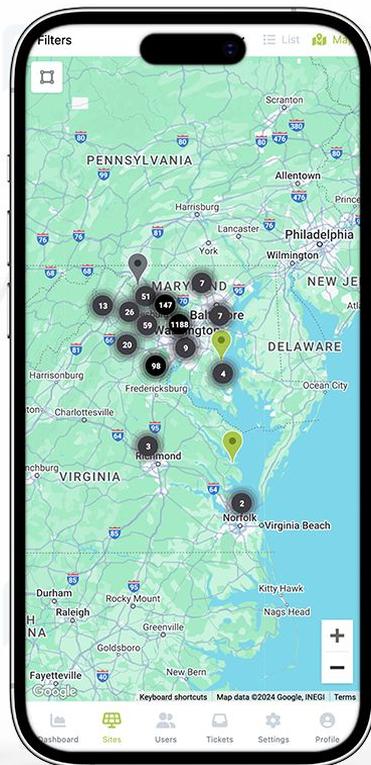

Automate workflows

Save time and reduce costs

Deliver a single, branded experience workflows

What You're Replacing with Sunvoy

Category	What It Replaces	How Sunvoy Improves It
eSignatures	 docusign  HELLOSIGN 	Prepare, send, and collect signed documents inside your dashboard... fully audit-logged.
Referral Management & Payouts	  <small>Get The Referral</small>	Track, manage, and automate branded payouts tied to customer milestones.
Email & Text Marketing		Send milestone-based SMS and emails automatically under your brand.
Field Photo Capture	  CompanyCam	Capture and store job-site photos right from your app.
Hardware Monitoring	   <small>ENPHASE.</small>	View all device data in one consolidated dashboard.

What You're Replacing with Sunvoy

Category	What It Replaces	How Sunvoy Improves It
Review Management		Request and display reviews directly from Sunvoy.
Customer Sentiment Tracking		Collect NPS-style feedback at key milestones.
Service Plan Administration		Manage warranties and extended service plans seamlessly.
Customer Portal		Offer customers a unified app to track their project, invoices, and referrals.
eShop		Sell products or upgrades directly through your customer app.

One Platform. Zero Fragmentation .

Everything your solar company needs is unified in one clean, efficient platform.

One Clean Operating System

Everything your team needs lives in one place.

Cuts Hidden Soft Costs

Less app-switching, fewer mistakes, faster work.

Purpose-Built for Solar

Workflows match how installers actually operate.

Seamless Customer Journey

No redirects — one branded experience end-to-end.

Scales Without Extra Tools

Growth doesn't require more apps or overhead.

Automation That Simplifies

Triggers, updates, and tasks run quietly in the background.

Consolidation Fuels Referrals (which is your highest-ROI channel)

When every step of the customer journey **lives in one platform**, referrals become effortless & profitable.

- ✔ One branded portal → trust is higher.
- ✔ One place to track progress → anxiety is lower.
- ✔ One click to refer a friend → friction disappears.

That's why Sunvoy installs generate more referrals.
Not because customers are asked more, **but because they're cared for better.**

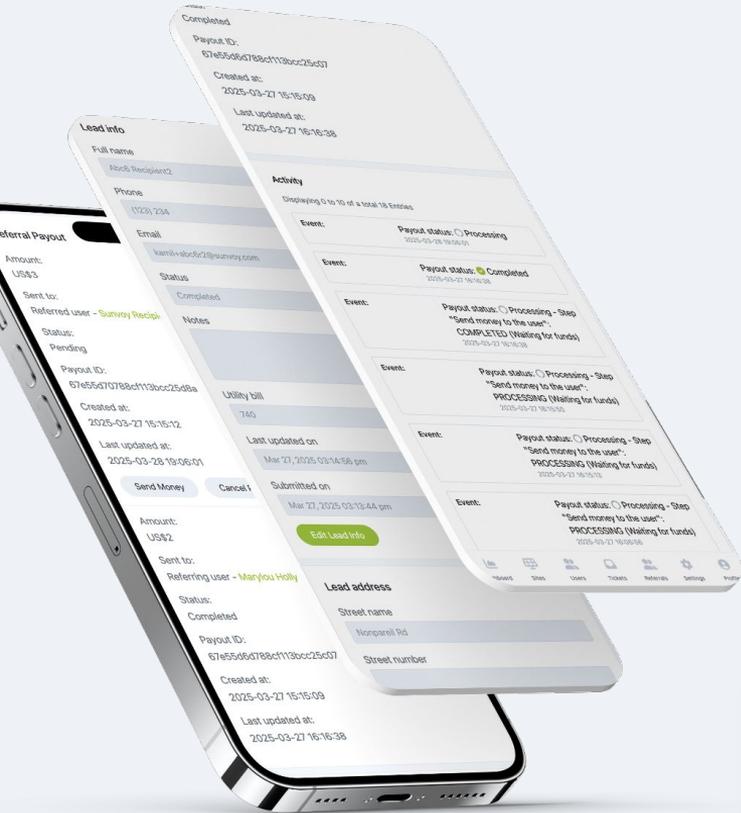

So What Happens When You Consolidate with Sunvoy?

Companies using Sunvoy experience:

- Referral CAC of ~\$150-\$250 outperforms \$900+ paid leads
- 1 head of ops manages what used to take 3
- 10-15 apps collapse into 1 unified platform
- Installers push 30-60% more volume with the same crew
- Admin costs fall 25-40% without touching payroll
- Customer LTV increases when upgrades live inside your portal

Your customers don't log into vendor apps.

They log into you.

From 12+ Different Apps to One Operating System

Without Sunvoy

- ✘ Teams juggle 8–12 different tools
- ✘ Ops wastes hours moving data between systems
- ✘ Customer info lives in 5 separate places
- ✘ Photos, documents, and contracts are scattered
- ✘ Hardware monitoring happens in vendor portals
- ✘ No one knows where the source of truth is
- ✘ Problems snowball → more labor, more cost

- ✔ Every workflow lives in one platform
- ✔ Sales, ops, and service share one data stream
- ✔ Customer records, documents, photos are all unified
- ✔ Hardware data from inverters in one view
- ✔ Referrals, reviews, & payouts inside the same ecosystem
- ✔ Less tech = fewer failures, faster installs, more revenue
- ✔ Your brand, your portal (not vendor logos everywhere)
