BUILT-IN PAYMENTS FOR SOLAR INSTALLERS

Stop chasing payments. Start building revenue.

Collect service fees, sell post-install upgrades, and bill recurring Protection Plans inside the branded portal your customers already use.

THE REAL VALUE Not just faster checkout; **fewer human touches for every dollar collected.**

FROM CHECKOUT TO PAYOUT

Payments should not create more work.

Sunvoy keeps checkout, processing, receipts, records, and payouts connected, so your team can spend less time chasing links and updating spreadsheets.

× WITHOUT SUNVOY

1 **Send a separate link**
The homeowner leaves your portal for a disconnected payment flow.

2 **Follow up manually**
Emails and calls pile up when service or invoice payments are missed.

3 **Reconcile the details**
Staff match amounts, invoice references, and customers across tools.

4 **Send the paperwork**
Receipts and records become another manual administrative task.

Every extra handoff slows collections, creates room for error, and makes post-install revenue harder to scale.

→ WITH SUNVOY

One customer action. The rest stays connected.

01 **Homeowner pays or subscribes**
Pay Now, logged-in checkout, an eShop purchase, or a recurring Protection Plan.

02 **Configured payment rules apply**
Use card or ACH based on the transaction, limits, and fee settings you choose.

03 **Stripe handles processing**
Payment processing, refunds, disputes, and the installer's payout flow stay with Stripe.

04 **Sunvoy keeps the record**
Transaction source, status, receipts, invoices, and customer payment history remain visible.

Less payment chasing	Fewer disconnected links	Cleaner records

ONE RELATIONSHIP · THREE REVENUE MOMENTS

Collect today. Sell tomorrow. Earn every month.

Sunvoy makes payments useful across the full customer lifetime, **not only when the original installation is sold.**

ONE-TIME

Pay Now

Collect invoice references, email addresses, and custom payment amounts through an open payment page.

CONNECTED

Logged-in payments

Prefill homeowner identity and connect the receipt and payment history to the customer's Sunvoy account.

PURCHASE

eShop checkout

Make batteries, EV chargers, upgrades, and other post-install products available to buy inside your portal.

RECURRING

Protection Plan subscriptions

Sell monitoring, protection, and service memberships with recurring subscription payments.

Flexible enough for real solar transactions.

Configure payment methods, limits, and fees by transaction type to protect margins without creating more admin.

Larger payments

Use bank payments when card fees do not make sense.

Quick checkout

Accept homeowner card payments with configurable limits.

Fees your way

Pass fixed or percentage surcharges or absorb them.

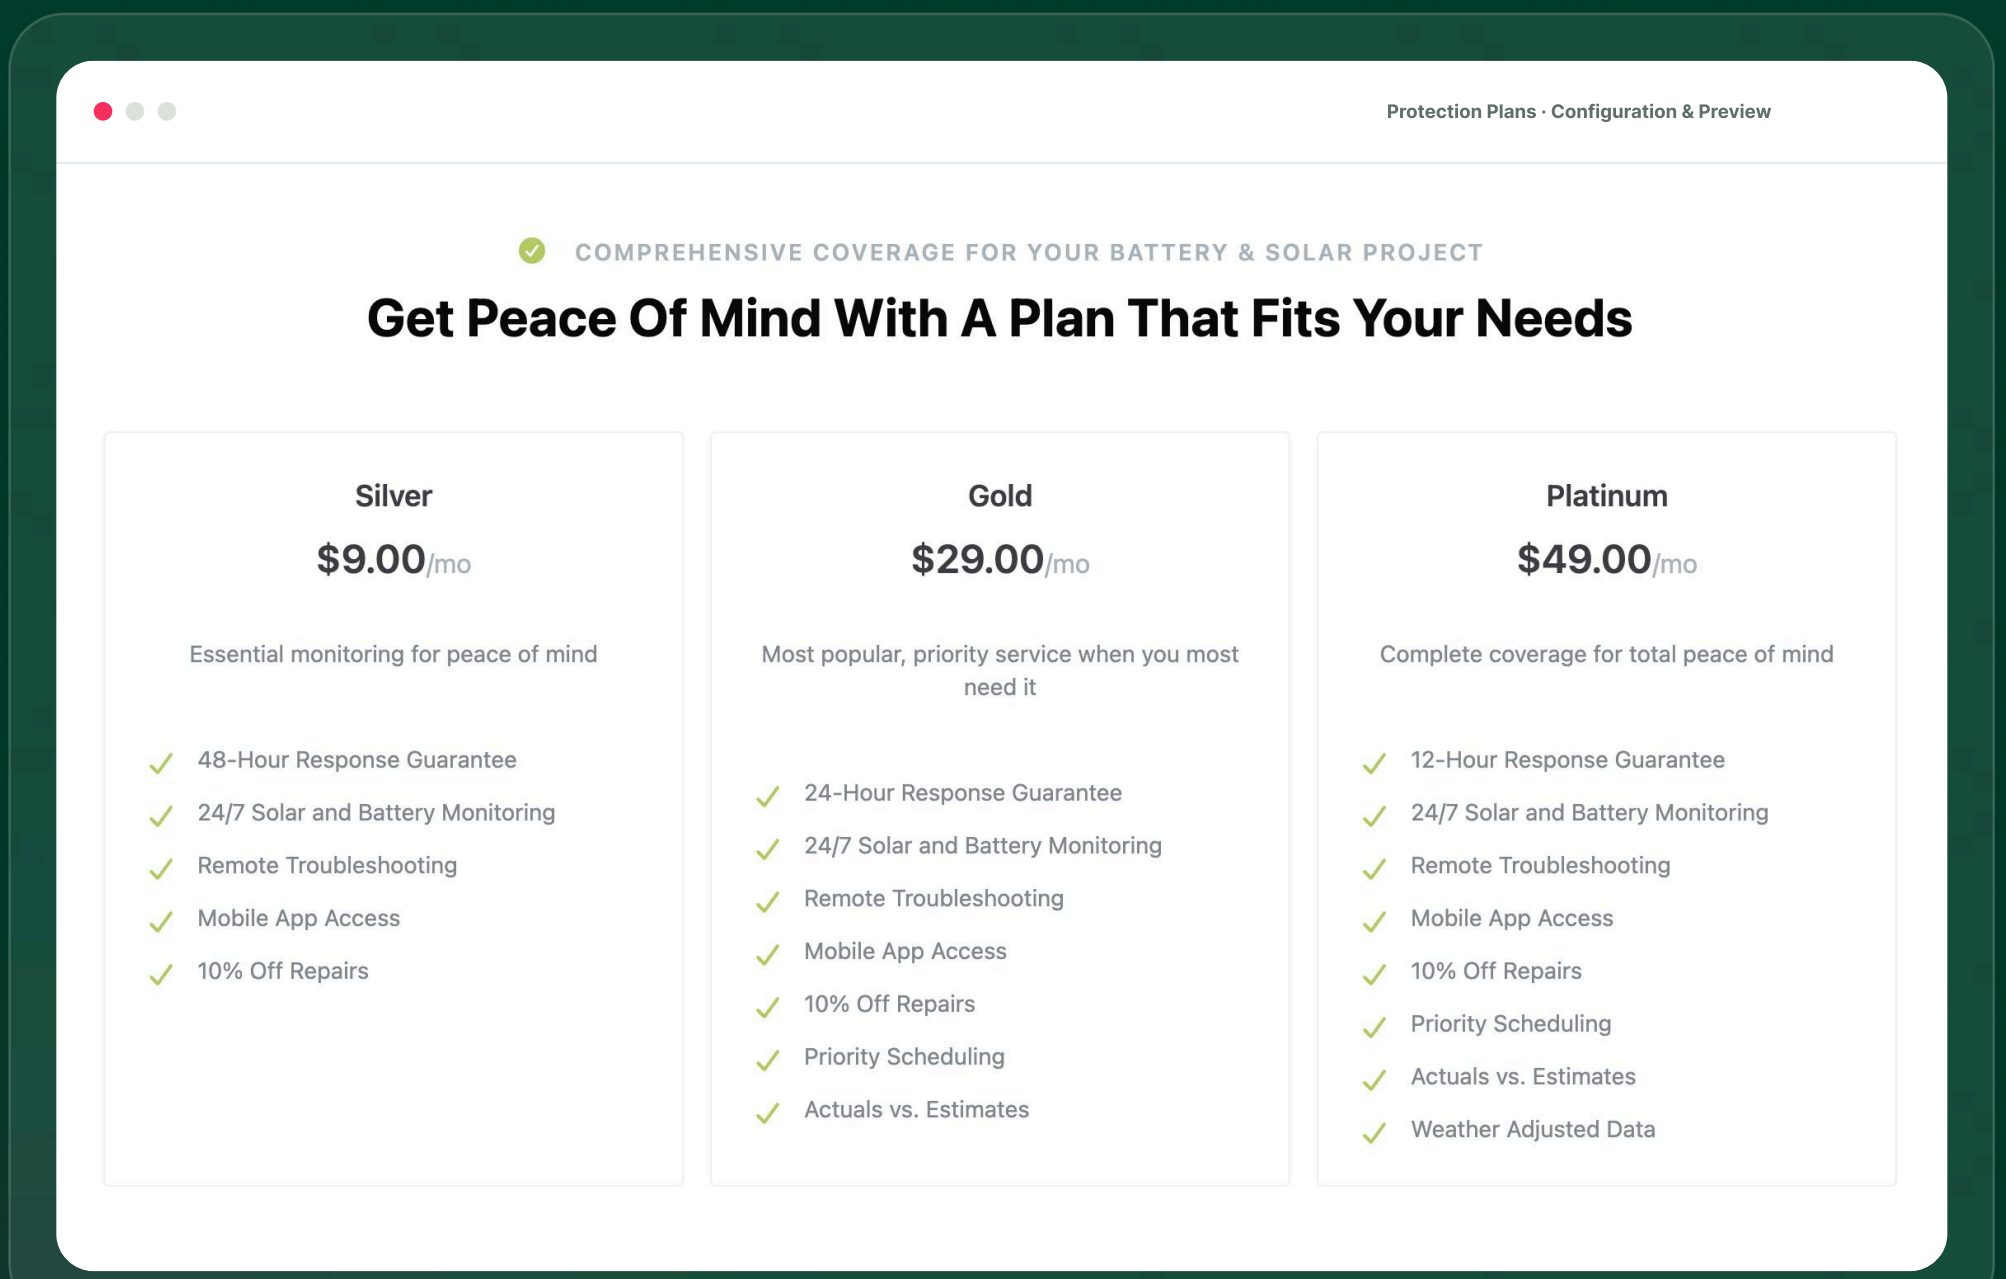

Smart routing

Direct larger balances toward ACH when card is capped.

NEW FEATURE

Protection Plans are now easier to configure and sell.

Create clear, customizable tiers homeowners can compare and subscribe to directly through your branded experience.

Custom pricing

Set the amount for every tier.

Clear benefits

Explain what each plan includes.

Visibility

Choose where plans appear.

Ordering

Control the customer comparison.

Consistent display

Match the shop and Protect page.

WHAT CHANGES FOR THE BUSINESS

Payment automation is an operating model.

ACTIVITY	MANUAL PROCESS	WITH SUNVOY
Customer checkout	Separate links, emails, and third-party handoffs	One branded portal for paying, buying, or subscribing
Payment method	Staff decides card vs. bank payment each time	Configured card, ACH, limit, and fee rules guide checkout
Recurring revenue	Custom invoices and repeated monthly follow-up	Homeowner subscribes to a recurring Protection Plan
Payment records	Receipts, invoices, and history live across tools	Source, status, documents, and history stay connected
Team workload	Employees touch the normal path and the exceptions	Employees focus on the exceptions that need judgment

THE OUTCOME

More revenue collected with less manual work.

Payments, purchases, and recurring plans—inside the Sunvoy experience your customers already know.

Collect before dispatch
Reduce unpaid service work.

Sell to the installed base
Capture post-install demand.

Build recurring revenue
Extend value beyond the installation.

Powered by Stripe Connect. Payment availability, processing fees, and payout timing may vary based on account configuration and Stripe terms.
